# PI-CFO | Nine-cycle modulation | Re=55 | velocity L2: 2.753% | pressure L2: 6.839%

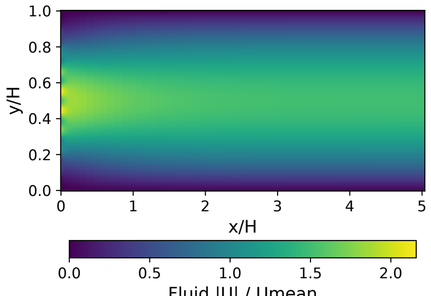

## 01 Input inlet profile

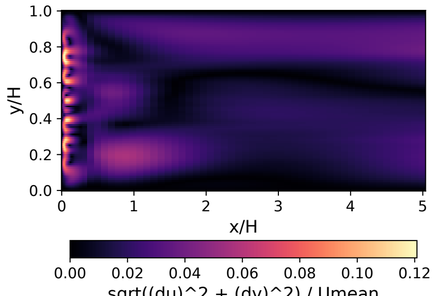

## 02 PI-CFO prediction

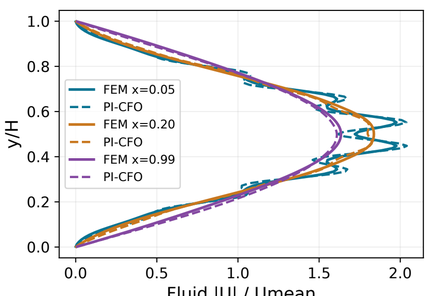

## 03 Independent FEM

## 04 Absolute vector error

## 05 Cross-section check

Same frozen 94k checkpoint. Independent mesh-refined FEM. Shared flow color limits. Selected exploratory examples; metrics use the saved entrance-dense grid.
