PI-CFO | Asymmetric inlet | Re=30 | velocity L2: 1.603% | pressure L2: 2.374%

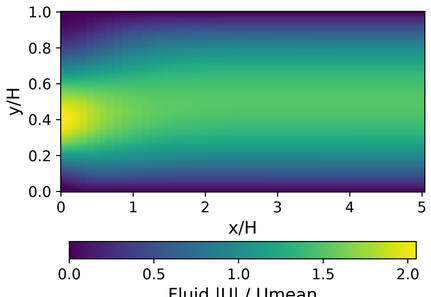

01 Input inlet profile

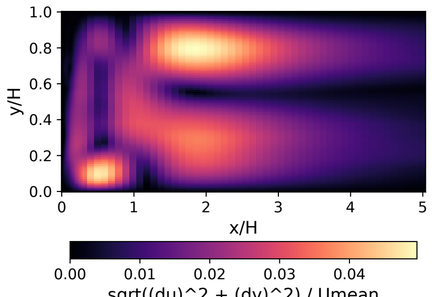

02 PI-CFO prediction

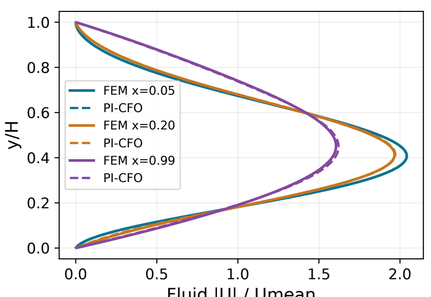

03 Independent FEM

04 Absolute vector error

05 Cross-section check

Same frozen 94k checkpoint. Independent mesh-refined FEM. Shared flow color limits. Selected exploratory examples; metrics use the saved entrance-dense grid.
