PI-CFO | Twin-peaked inlet | Re=20 | velocity L2: 0.946% | pressure L2: 1.833%

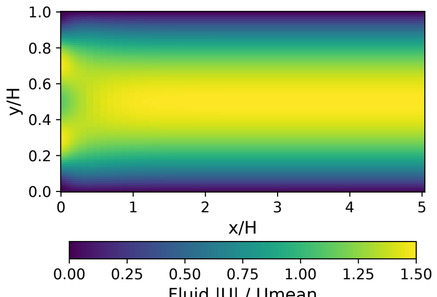

01 Input inlet profile

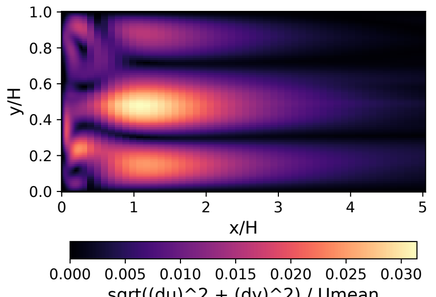

02 PI-CFO prediction

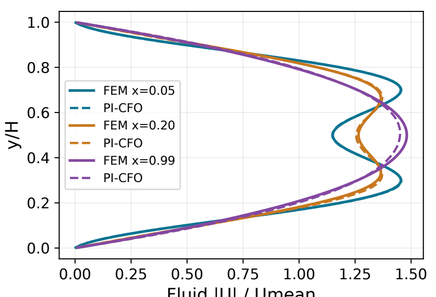

03 Independent FEM

04 Absolute vector error

05 Cross-section check

Same frozen 94k checkpoint. Independent mesh-refined FEM. Shared flow color limits. Selected exploratory examples; metrics use the saved entrance-dense grid.
