PI-CFO | Corner launches / experiment B | with time vs without measured time

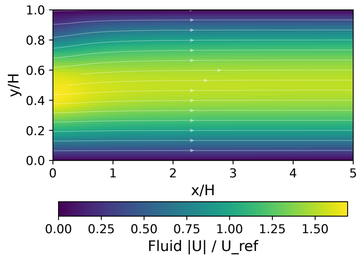

01 Given ordered paths

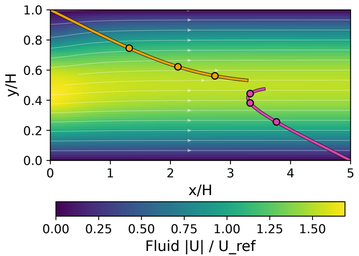

02 Two inferred inlets

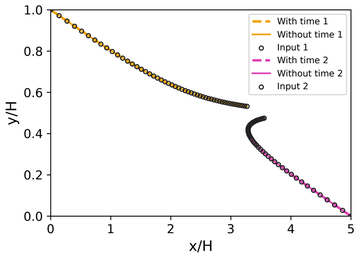

03 Flow without time

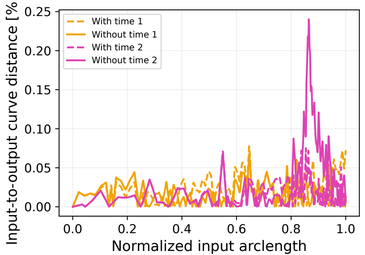

04 Particles in that flow

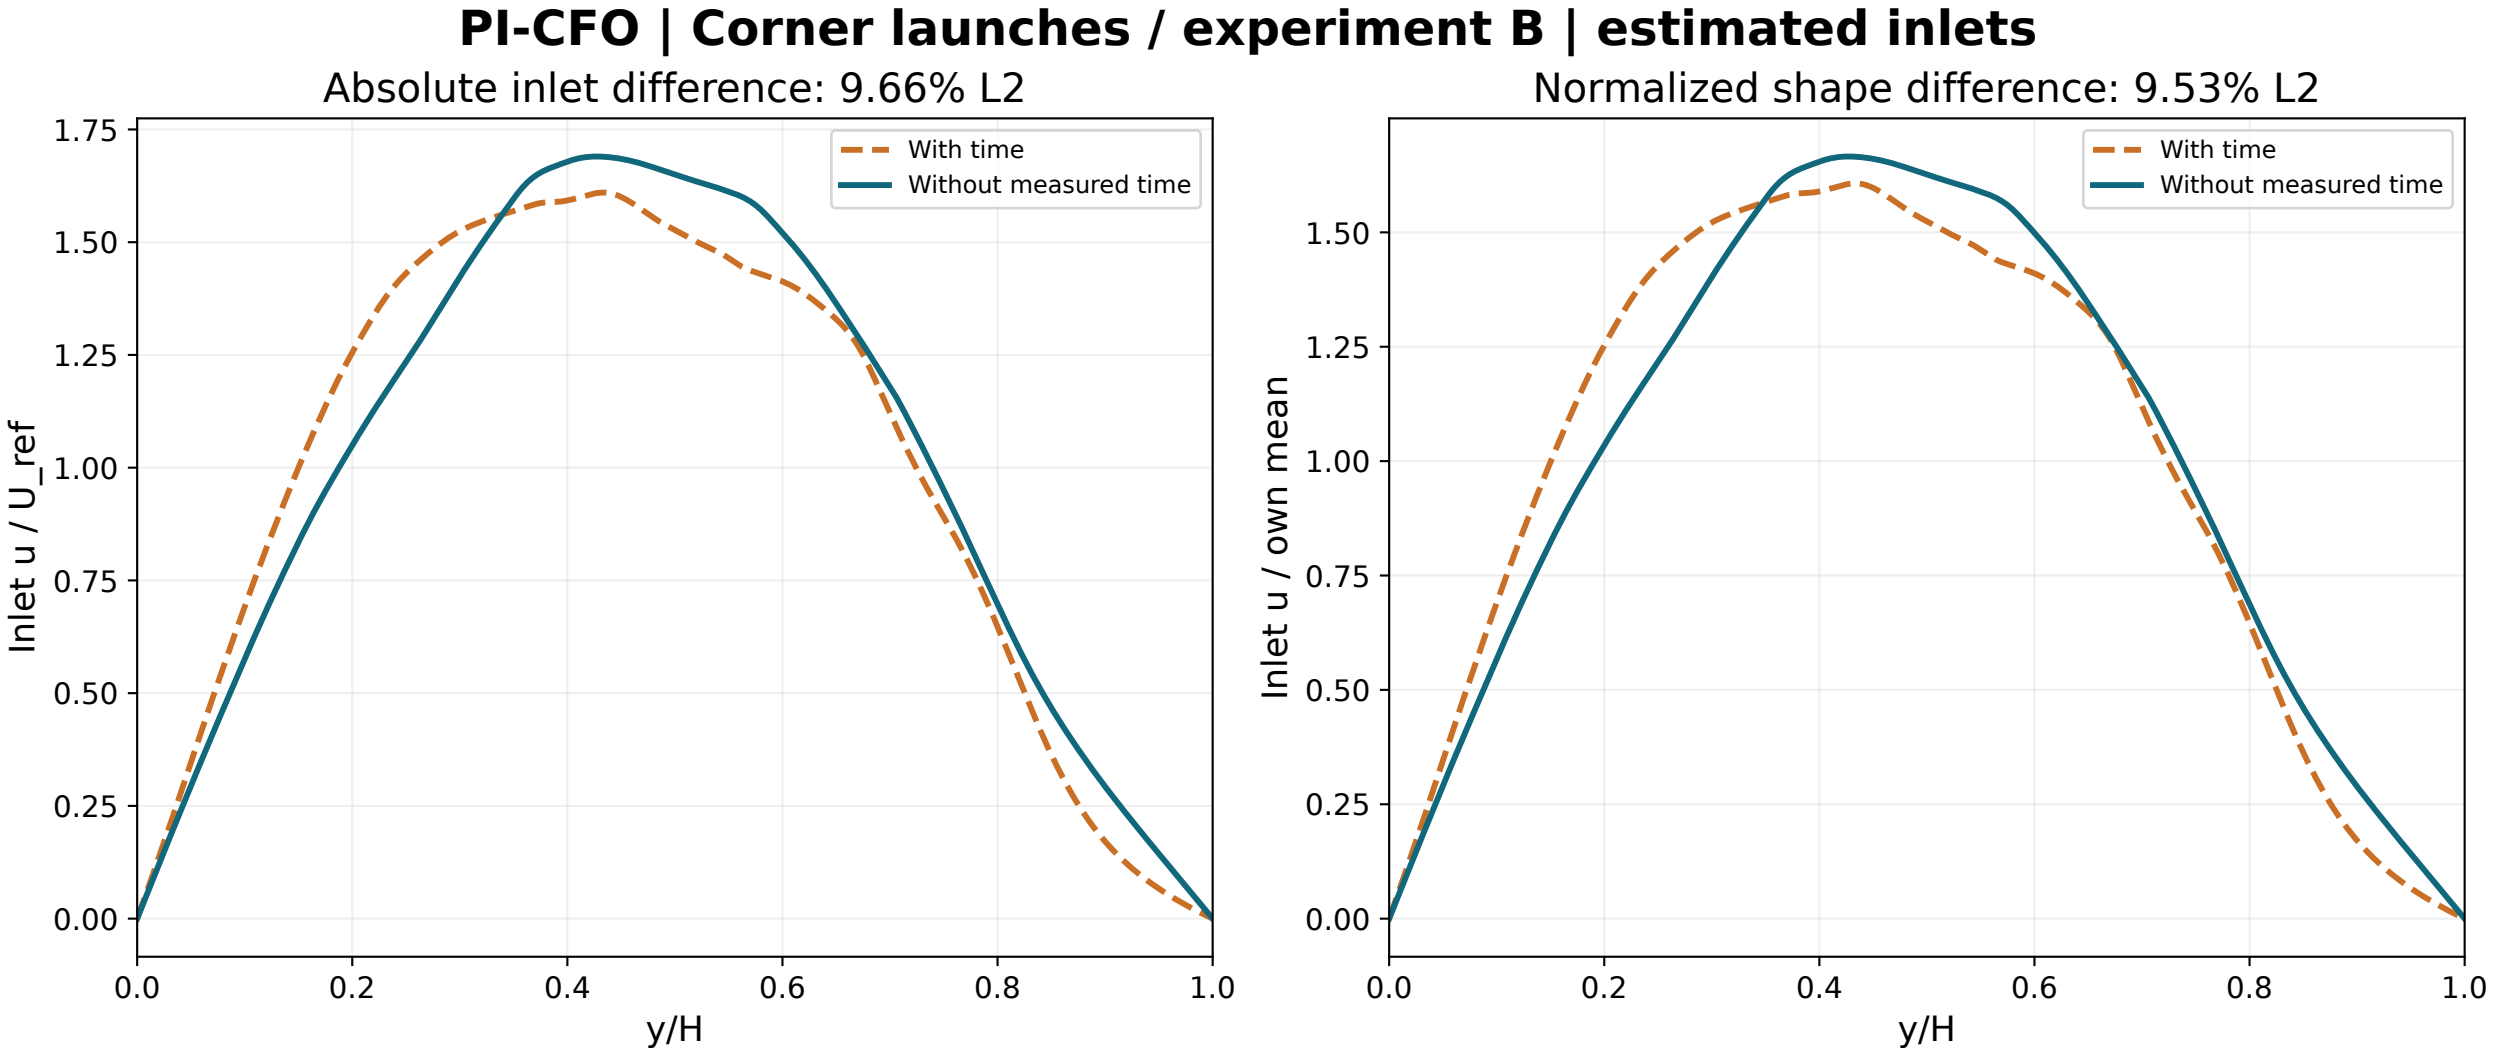

05 Both path predictions

06 Geometric mismatch

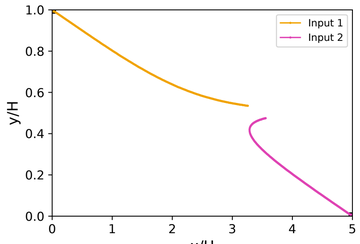

Solid: without measured time; dashed: with time; open circles: given geometry. Both outputs are independent ODE replays. Curve agreement does not guarantee matching inlet profiles.

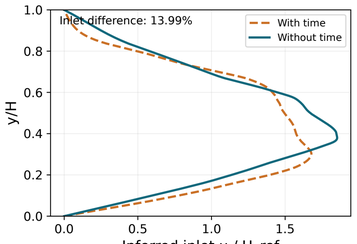

PI-CFO | Corner launches / experiment B | estimated inlets
Absolute inlet difference: 9.66% L2
Normalized shape difference: 9.53% L2

PI-CFO | Corner launches / experiment A | with time vs without measured time

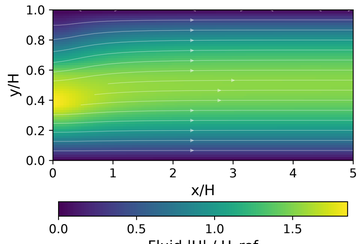

01 Given ordered paths

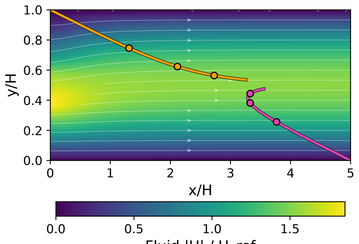

02 Two inferred inlets

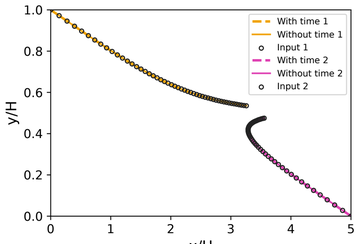

03 Flow without time

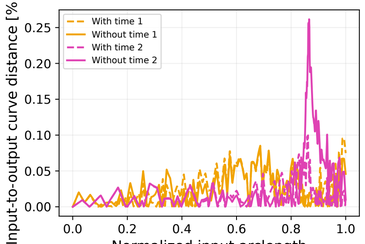

04 Particles in that flow

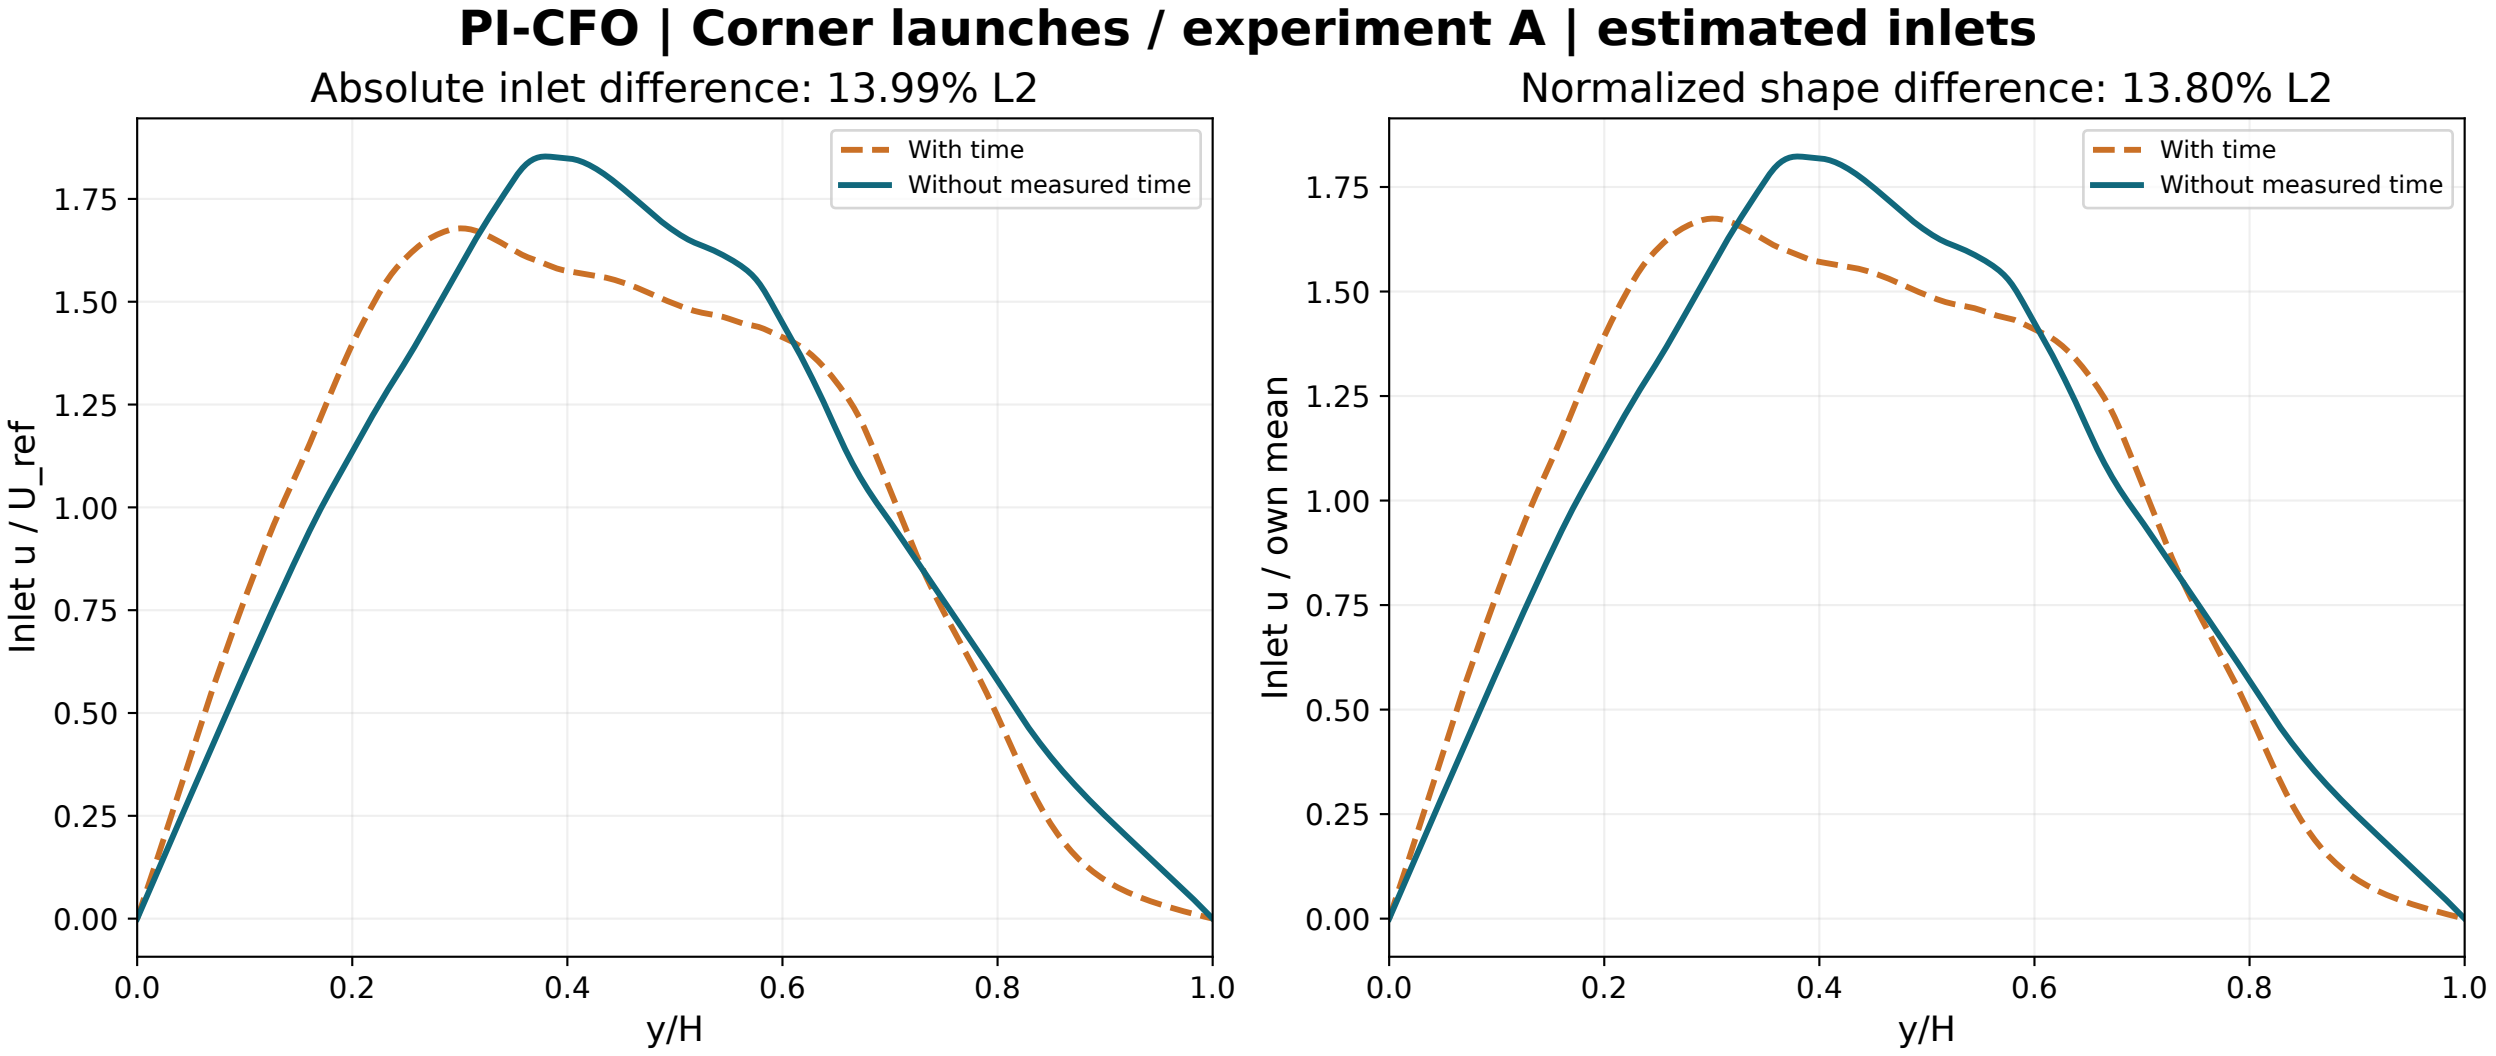

05 Both path predictions

06 Geometric mismatch

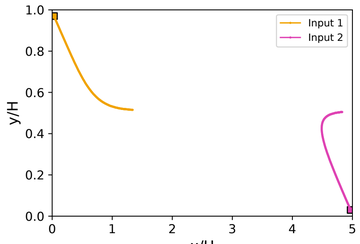

Solid: without measured time; dashed: with time; open circles: given geometry. Both outputs are independent ODE replays. Curve agreement does not guarantee matching inlet profiles.

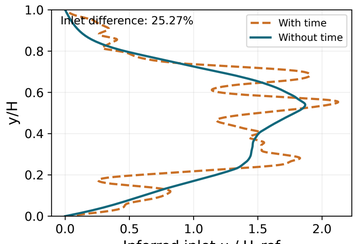

PI-CFO | Corner launches / experiment A | estimated inlets
Absolute inlet difference: 13.99% L2
Normalized shape difference: 13.80% L2
