PI-CFO | Oblique launches | reconstruction without measured time

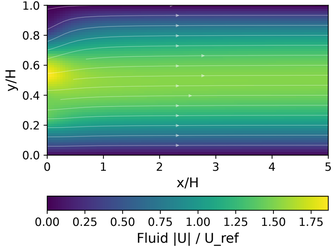

01 Given ordered paths

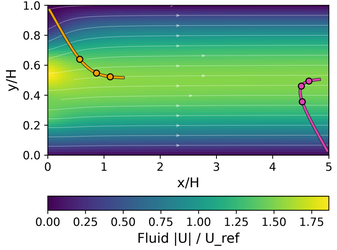

02 Inferred inlet profile

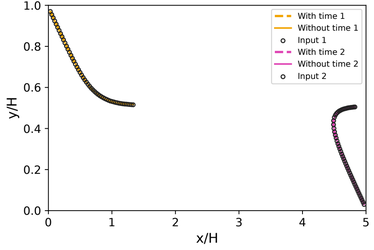

03 Flow without time

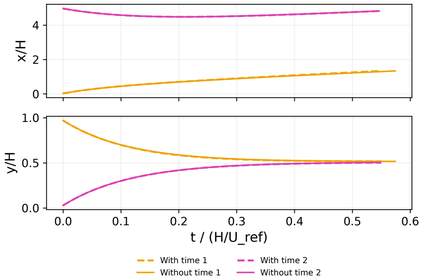

04 Particles in that flow

05 Both path predictions

06 x(t) and y(t)

Solid: without measured time; dashed: with time. Panel 02 shows only the no-time inlet. Panel 06 uses inferred time for the no-time fit; neither clock is rescaled.
